Support	Below a list of the most prominent new features and changes:	
	 Added support for exam ID in SEB Server configurations. Added support for secured quizzes with SEB Server and Moodle 3.9 (Deeper Integration). 	
	Added support for battery and WLAN status logging with SEB Server. Ensured missing machine info doesn't prevent startup.	
	Ensured remote connections are recognized during startup. Fixed CORS issues.

Safe Exam Browser	News About - Alliance - Download - Windows - macOS - iOS - Support -
	macOS
	Safe Exam Browser 3.0 for macOS Current version of Safe Exam Browser for macOS 12, 11, 10.15, 10.14, 10.13, 10.12, 10.11 Build 343F. SHA1: 03a761833c4dbb808c0fb7fc3d8324b591f8435b Download from GitHub project site. SEB 3.0 for macOS is a major update, supporting the modern WebKit browser engine and access to camera/microphone via WebRTC.
	 Support for the modern WebKit browser engine (WKWebView), which increases performance, stability and compatibility with web applications. Access to camera/microphone via WebRTC on macOS 11.1 Big Sur and newer. You can use web-based video conferencing and remote proctoring solutions, as long as the requirements explained in release notes are met, so that SEB can use the modern WebView. Note: Apple currently doesn't support <i>getDisplayMedia</i> in WKWebView for screen sharing. Due to refactored code using newer APIs, SEB 3.0 requires macOS 10.11 or later (using the modern WebView requires macOS 10.13 or later). We recommend to only use macOS versions which still receive security updates from Apple (the three most recent, currently macOS 10.14.10.15 and 11.). Support for the new SEB JavaScript API for easier integration into exam solutions (currently for querying app version details, ConfigKey and BrowserExamKey security elements). Support for restart session (<i>Preferences/Exam/Link to quit SEB after exam/Restart instead of quitting</i>) and quit SEB/session features, which are mostly interesting for managed Macs and kiosk environments: If client settings are secure (have a quit password set), SEB was not started with a seb(s) link or .seb file and an exam session is quit, SEB is not quit (terminated), but only the exam session (SEB is restarted with client settings). Added setting in <i>Preferences / Security / Check full macOS version number</i> for full control about minimal allowed macOS version numbers). Use AAC kiosk mode only on macOS 15.4+ and 11.4+ (except 11.0 - 11.3, as there was an issue with DNS lookup. This

Aparecerá la siguiente página en donde, de una manera automática, se descargará un archivo .dmg.

Si no ocurre esto, actualiza la página y comprueba que el contador verde llega a 0 y se descarga el .dmg.

Al pulsar en el archivo descargado, aparecerá la siguiente pantalla. Arrastra Safe Exam Browser a Applications.

A continuación, accede a Safe Exam Browser y permite el acceso.
